

Teddy Roosevelt Match

First, a little history. The original "Teddy Roosevelt Match" was a silhouette match held at Buffalo Creek starting back in the 80's. It was named after "Teddy" because he started the USFS in 1905. Without a National Forest, we would likely not have our range. It was a two day affair which attracted 40+ shooters from several states, including National Champions and National and Olympic team members. Several of the shooters involved in our program used to shoot in the original "Teddy Roosevelt" silhouette matches. We have revived it for our Rimfire Benchrest Match.

A trophy has been made upon which each year's "High Overall" winner's name, score, and year won, will be engraved on a brass plate and attached to its base.

Originally we planned on it being a 1000 point aggregate match, but with the limited benches we have available, we have shortened it to a 750 point aggregate, and with 7 benches we have to limit it to 21 shooters on 3 relays. The scores shot in our regular matches will be used to qualify for this special "double points" match. You can qualify for up to two classes, and we will keep track of scores that fall outside the 21 shooter limit. Some shooters may only choose to shoot one class, or may not be able to participate at all, so we will move competitors up in rank as needed, in other words, you may qualify 23rd, but if a couple of people drop out or drop classes, you might still make the cut. The qualifying shooters will get to pick their relay, and bench, in the order of their scores, so high score picks first, second highest picks second and so on.

The Teddy Roosevelt Trophy will not be a traveling trophy. The RFBR Match Directors will provide each year's "High Overall" winner with a professionally framed, high quality photograph of them proudly displaying the trophy representing their accomplishment.

Thank you for your understanding and acceptance on this matter.

Sincerely,

Jp & Del

Teddy Roosevelt Match
